Tool Hive

Precision tools, smarter sourcing.

Tool Hive brings together complementary tooling technologies under one customer-focused portfolio. The objective is to make it easier for manufacturers to access the right tool, specification and application support.

6+ core product brands	7 portfolio areas	360° application-led approach	1 single customer interface
----------------------------------	-----------------------------	---	---------------------------------------

What we bring together

- **Machining:** turning, milling, drilling, threading, grooving and solid-carbide solutions.
- **Tool holding:** precision holders and accessories for CNC/VMC applications.
- **Metal cutting:** bandsaw blades and holesaw solutions.
- **Deburring:** tungsten carbide rotary burrs in standard, long and miniature formats.
- **Process support:** speciality lubricants for a wide range of industrial applications.

Our portfolio at a glance

01

PROCARB

Precision cutting tools

Turning • Grooving • Threading • Milling • Solid Carbide • Drilling • Tool Holding

02

ARRIS TOOLING

Precision tool holding

HSK • BT • CAT • Hydraulic • Shrink-Fit • ER • Modular & Accessories

03

SUPER AUTO TOOLS

Carbide rotary burrs

Tungsten Carbide • Long Burrs • Miniature Burrs • Deburring

04

ALFA PLUS

Metal cutting

Bimetal Bandsaw Blades • Holesaws • Application-focused blade selection

05

BELZ / EXCEL X BELZ

Swiss precision tools

Taps • End Mills • Drills

06

ELAN

Speciality lubricants

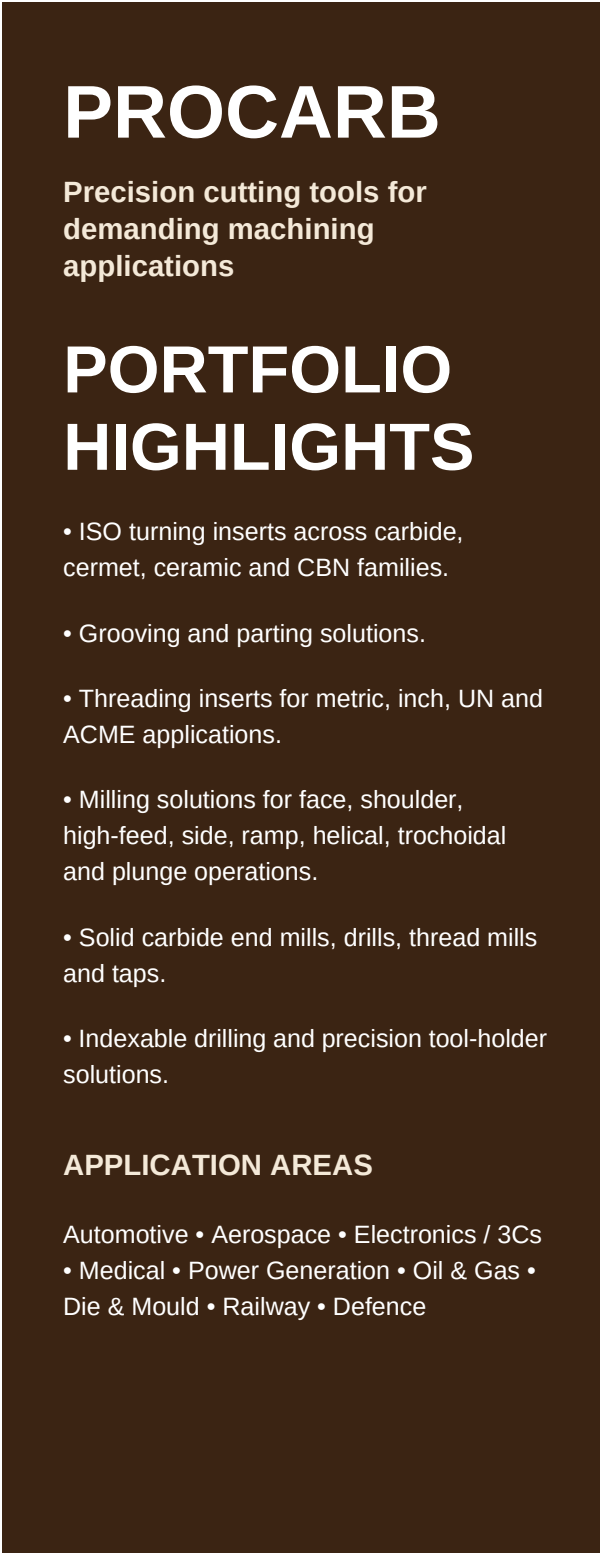

Automotive • Bearings • Die & Mould • Gear • General Industry • Aerospace • Marine

07

GRIP THE FUTURE
WITH ADVANCED TOOL HOLDERS

Your Partner in Precision & Performance

ARRIS TOOLING

High-precision spindle tooling and
tool holding systems

PORTFOLIO HIGHLIGHTS

- Standard and high-precision HSK tooling.
- Hydraulic expansion chucks and shrink-fit holders.
- ER collet chucks and modular boring solutions.
- Face / shell mill holders and Weldon / side-lock holders.
- Reduction sockets, pull studs, ER nuts, baby collets and accessories.
- Common interfaces include BT, CAT, SK, ISO and HSK formats.

APPLICATION AREAS

CNC / VMC machining • High-speed machining • Precision tool holding • Die & mould

**Manufacturers of
Tungsten Carbide Rotary Burrs**

SUPER AUTO TOOLS

Tungsten carbide rotary burr
solutions

PORTFOLIO HIGHLIGHTS

- Tungsten carbide rotary burrs for precision cutting and deburring.
- Standard, long and miniature burr formats.
- Extended-length SS range options are featured in the supplied catalogue.
- Suitable for maintenance, fabrication and finishing operations.
- Complementary drill products are included in the supplied product range.

APPLICATION AREAS

Deburring • Die work • Maintenance •
Fabrication • Precision finishing

MISSION & VISSION

Our mission is to manufacture products of the highest quality at the right price whilst servicing all our stakeholders' requirements with the upmost priority. Our manufacturing is done at an optimum precision level with the best-in-class facilities. We are customer-obsessed and are continually committed to exceeding all expectations and shattering all glass ceilings.

WHY CHOOSE ALFA PLUS

1.

The collaboration with German steel ensures that every Alfa Plus blade is crafted using Special steel, which is synonymous with robustness and longevity.

2.

But what truly distinguishes Alfa Plus? It's the promise of delivering the cheapest cost per cut in the industry, coupled with the longest cutting life. While we position ourselves alongside top-tier brands, our primary commitment remains to provide unparalleled value.

3.

In an evolving landscape, Alfa has always endeavored to merge tradition with innovation. Today, with Alfa Plus, we raise the bar, offering solutions that are not only efficient but also remarkably cost-effective. This is not just an upgrade; it's a revolution in the world of bandsaw blades.

ALFA Premium Brand

**ALFA
PLUS**

ALFA PLUS

Metal-cutting solutions focused on productivity and cost-per-cut

PORTFOLIO HIGHLIGHTS

- Bimetal bandsaw blade and holesaw solutions.
- ALFA Plus premium blade range.
- VIRTUE, DARTY, PRIMO and WARRIOR families appear in the supplied catalogue.
- Application support and blade-selection resources are part of the product ecosystem.
- The supplied catalogue documents ISO 9001:2015 certification for manufacture of various types of saw blades.

APPLICATION AREAS

Aerospace • Oil & Gas • Structural Engineering • General Metal Cutting

BELZ / EXCEL X BELZ

Swiss precision cutting tools

PORTFOLIO HIGHLIGHTS

- Taps, end mills and drills form the core cutting-tool portfolio shown in the supplied materials.
- Precision tooling formats for accurate machining operations.
- A complementary range for customers seeking precision small-tool solutions.
- The portfolio can be combined with Procarb and Arris tooling for complete machining requirements.

APPLICATION AREAS

Precision machining • Tapping • Milling •
Drilling • Component manufacturing

ELAN

Speciality lubricants for industrial applications

PORTFOLIO HIGHLIGHTS

- Speciality lubricant portfolio from the supplied ELAN catalogue.
- Applications include automotive, bearings, die & mould, gears & transmission, agriculture and general industry.
- Additional application coverage includes aerospace and marine.
- A process-support portfolio that complements cutting tools and machining solutions.

APPLICATION AREAS

Automotive • Bearings • Die & Mould • Gear & Transmission • Agriculture • General Industry • Aerospace • Marine

FONHAE

Additional sourcing for specialized tooling requirements

Fonhae is positioned in the Tool Hive portfolio as an additional sourcing channel for specialized and application-specific tooling requirements. It complements the core Tool Hive brands when a customer needs an extended or non-standard product option.

WHEN IT HELPS	WHAT TOOL HIVE DOES
Specialized tooling	Review the requirement and identify a suitable sourcing route.
Non-standard formats	Support requests outside the regular stocked portfolio.
Application-specific needs	Coordinate product information and commercial follow-up.

Tool Hive: one interface for multiple tooling needs.

The goal is to simplify sourcing while keeping the focus on application suitability, productivity, consistency and commercial responsiveness.

Application-led solutions

Tool Hive can combine multiple product families around the manufacturing process rather than treating every requirement as a standalone item.

PROCESS	PORTFOLIO	SOLUTION FOCUS
Turning	PROCARB	ISO inserts • CBN / ceramic / carbide options • Tool holders
Milling	PROCARB + ARRIS	Face / shoulder / high-feed / solid carbide • Precision holders
Drilling	PROCARB + BELZ	Solid carbide / indexable drilling • Drills
Threading	PROCARB + BELZ	Threading inserts • Taps • Thread mills
Grooving	PROCARB	Grooving and parting solutions
Deburring	SUPER AUTO TOOLS	Tungsten carbide rotary burrs
Metal Cutting	ALFA PLUS	Bandsaw blades • Holesaws
Process Support	ELAN	Speciality lubricants

Why Tool Hive

MULTI-BRAND DEPTH

Multiple complementary product families allow application-led recommendations.

ONE COMMERCIAL INTERFACE

Multiple tooling requirements can be coordinated through one Tool Hive contact.

SPECIAL REQUIREMENTS

Additional sourcing capability supports specialized or non-standard requirements.

TECHNICAL ORIENTATION

Selection can be discussed around material, operation, machine, interface and desired result.

APPLICATION COVERAGE

Machining, tool holding, metal cutting, deburring and industrial lubrication.

LONG-TERM PARTNERSHIP

The focus is on repeatable solutions, dependable supply and practical support.

Our promise

Precision Tools, Smarter. We simplify tooling decisions by bringing product breadth, application thinking and responsive communication together.

TOOL HIVE
PRECISION TOOLS, SMARTER

PRECISION TOOLS, SMARTER.

Thank you for considering Tool Hive for your tooling and industrial requirements.
